

Dickerson Harbor

Winterizing Checklist

- Change coolant – fresh-water cooled engines only
- Change oil in engine and generator
- Top-off fuel tanks and add biocide – diesel engines only
- Flush raw-water circuit
- Drain water tanks
- Drain and bypass water heater
- Run antifreeze through fresh water loop
- Drain and run antifreeze through AC, windshield wipers, icemakers, etc.
- Clean and dry bilges
- Cover engine room vents
- Leave cabinets and lockers open, cushions aired

During Off Season

- Replace raw-water impeller
- Inspect hoses, belts, etc.
- Degrease, derust, touch-up engine parts
- Grease control cables
- Coat unpainted parts with an anti-corrosion spray
- Test lighting, replace bulbs as necessary

Before and After Launch

- Tighten stuffing box
- Reconnect water heater
- Flush water tanks and lines
- Run and test all pumps
- Start engines/generator, check water flow, engine temperature

- Polish hull
- Paint bottom
